PROFESSIONAL PROFILE

Data Science Undergraduate at SLIIT with a strong foundation in statistical analysis, machine learning validation, data management pipelines, and full stack development. Possesses hands-on experience in preprocessing complex datasets, auditing model performance using advanced evaluation metrics, and ensuring data integrity across system architectures. A methodical problem solver and detail-oriented communicator seeking to leverage analytical skills to support algorithm assurance, compliance testing, and data-driven insights.

EDUCATION

- **Sri Lanka Institute of Information Technology (SLIIT) - [2024 - 2028]**
Bachelor of Science Honours in Information Technology Specialized in Data Science (Reading)
- **Nalanda Boys' Central College, Minuwangoda**
G.C.E Advanced Level - Maths Stream [2023]
G.C.E Ordinary Level [2020]

CERTIFICATIONS

- Introduction to Data Science Certificate course – Cisco [June 2026]
- Data Visualization course – Kaggle [June 2026]
- UI/UX with Freelancing certificate Course -IT Guru Global [NOV 2024 – FEB 2025]
- ADOBE PHOTOSHOP Basic to Advanced Certificate course- Master.LK [2024]
- Assured Diploma in IT (DITEC) – Esoft Metro Campus [NOV 2021]

EXTRACURRICULAR ACTIVITIES

- Volunteering – Member of LEO CLUB of SLIIT [2025- Present]
- Volunteering – Editor & Event Coordinator of **Voice Of Nalanda**(Non-Profit Organization)[2024 – Present]
- Deputy Head Prefect –Nalanda boys' central college, Minuwangoda [2022-2023]

SKILLS

Technical Skills:

- **Programming Language** : Java , Python, R, JavaScript , C
- **Frameworks & Tech Stacks**: Java Spring Boot, MERN Stack –MongoDB, Express.js, React, Node.js.
Mobile Development – React Native
- **Databases & Data Management** : MySQL , Microsoft SQL Server, MongoDB(NoSQL)
- **Web development** : HTML5 , CSS3 , JavaScript
- **Software Engineering Fundamentals** : Data Structures & Algorithms , OOP Concepts, Design Patterns
- **UI/UX Design** : Figma
- **AI/ML** : Supervised/Unsupervised Learning, Neural Networks (CNN), Generative AI
- **Data Science** : Data Cleaning, Data Mining, and Data Preprocessing, Feature Engineering
- **Data Analysis** : NumPy, Pandas, SciPy, R Programming.
- **Data Visualization** : Matplotlib, Seaborn, Plotly,
- **Version Controlling** : Git/GitHub

Soft Skills:

- Leadership & Project Management
- Communication & Collaboration
- Problem Solving & Discipline
- Analytical Thinking & Attention to Detail.

GOVICONNECT: SMART AGRICULTURE PLATFORM & AI-BASED DISEASE DIAGNOSTIC SYSTEM
[JANUARY 2026 – MAY 2026] – GROUP PROJECT

- Tools & Technologies : Java (Spring Boot), Python(FastAPI), RESTful APIs, CNN, MySQL , Gemini API ,
- Developed a CNN-based (ResNet) diagnostic engine to accurately identify paddy leaf diseases from images, improving early detection capabilities.
 - Architected a dual-backend system using Java (Spring Boot) and Python (FastAPI) connected via RESTful APIs, implementing automated verification checks to ensure data integrity and accuracy during data transfers and MySQL database updates.
 - Engineered "Govi Mart," a D2C e-commerce marketplace, alongside a smart advisory engine that delivers location-specific crop and fertilizer recommendations.
 - Integrated Gemini API (LLM) to power an automated community forum assistant, providing instant, context-aware expert support to farmers.
 - Built a digital farming workspace and admin dashboard featuring real-time agricultural news feeds, a personal task/yield tracker, and comprehensive system reporting tools.

GOVI CONNECT: AGRI-TECH MOBILE APP [JANUARY 2026 – MAY 2026] –GROUP PROJECT

- Tools & Technologies : React Native, Node.js, Express.js, MongoDB, Cloudinary, JWT, Expo (EAS), Railway
- Developed a full-stack mobile application featuring a discussion forum, expert blogs, smart crop advisory, activity trackers, and the "GoviMart" marketplace.
 - Engineered a secure RESTful backend API using Node.js and Express.js, implementing JWT authentication and middleware-based role-based access control (RBAC) for farmers, experts, and admins.
 - Integrated Cloudinary to handle efficient, cloud-based image management and storage for user media and product listings.
 - Deployed the backend to Railway and configured production Android build pipelines (both preview APKs and production releases) using Expo Application Services (EAS).

SMILECARE: WEB BASED DENTAL MANAGEMENT SYSTEM [JULY 2025 – DECEMBER 2025] –GROUP PROJECT

- Tools & Technologies : Java (Spring Boot), RESTful APIs, Microsoft SQL server , HTML , CSS , JavaScript
- Developed a clinic management system to digitize manual paper-based workflows and enhance overall operational efficiency.
 - Implemented a secure multi-role authentication framework featuring hashed passwords and Role-Based Access Control (RBAC) for six distinct user types.
 - Engineered automated appointment scheduling and patient profile management modules to streamline registrations and significantly reduce clinic waiting times.
 - Clinical & Supply Chain: Integrated a digital diagnostics hub for X-ray management and built an inventory/supplier system to automate clinical stock tracking.

AIML PROJECT: LOAN PREDICTION SYSTEM [JULY 2025 – DECEMBER 2026] – GROUP PROJECT

- Tools & Technologies : Python , Pandas, Numpy, Scikit-learn , matplotlib, seaborn, Jupyter Notebook
- It predicts whether a loan will be approved or rejected based on applicant data using ML models.
 - Data Preprocessing : Handling missing values, Encoding, Normalization, splitting data set.
 - Model Validation & Testing: Evaluated and audited multiple machine learning algorithms to ensure prediction accuracy and compliance with objective performance standards –**Algorithms Used: Logistic Regression ,Decision Tree Classifier, Random Forest Classifier ,Multi-Layer Perceptron (MLP), K-Nearest Neighbors (KNN), Support Vector Machine (SVM)**
 - Evaluation Metrics : Accuracy Score, Precision, Recall, F1-Score , Confusion Matrix

SECOND-HAND CAR MARKETPLACE | JAVA SERVLET DEVELOPMENT [JAN 2025 – JULY 2025] – GROUP PROJECT

- Tools & Technologies : Java Servlet , GlassFish server, File based data management, OOP concepts, HTML,CSS
- Marketplace Core: Developed a complete buy/sell platform with detailed vehicle listings, advertisement posting, and secure user authentication.
 - Igorithmic Verification: Implemented and optimized a custom Merge Sort algorithm on a linked linear data structure, verifying sorting efficiency, outcome accuracy, and data consistency under varying load sizes
 - Applied Object-Oriented Programming principles—Inheritance, Encapsulation, and Polymorphism—to ensure a modular and scalable codebase.
 - User Engagement: Integrated an interactive feedback system and smart transaction management to streamline the user experience.
