PROFESSIONAL PROFILE

Data Science undergraduate at SLIIT specializing in machine learning, predictive modeling, and data pipelines, with a strong foundation in full-stack development. Proficient in end-to-end model development — from EDA and feature engineering to evaluation — using Python, SQL, and scikit-learn. Seeking an internship opportunity to apply both data science and full-stack expertise in a real-world, data-driven environment.

EDUCATION

- Sri Lanka Institute of Information Technology (SLIIT) - [2024 - 2028]**
Bachelor of Science Honours in Information Technology Specialized in Data Science (Reading)
- Nalanda Boys' Central College, Minuwangoda**
G.C.E Advanced Level - Maths Stream [2023]
G.C.E Ordinary Level [2020]

CERTIFICATIONS

- Data Analytics Essential Certificate course - Cisco [June 2026]
- Introduction to Data Science Certificate course - Cisco [June 2026]
- Data Visualization course - Kaggle [June 2026]
- UI/UX with Freelancing certificate Course -IT Guru Global [NOV 2024 - FEB 2025]
- Assured Diploma in IT (DITEC) - Esoft Metro Campus [NOV 2021]

EXTRACURRICULAR ACTIVITIES

- Volunteering - Member of LEO CLUB of SLIIT [2025- Present]
- Volunteering - Editor & Event Coordinator of **Voice Of Nalanda** (Non-Profit Organization) [2024 - Present]
- Deputy Head Prefect -Nalanda Boys' Central College, Minuwangoda [2022-2023]
- Treasurer-Sea Scouts Rover Crew, Nalanda Boys' Central College, Minuwangoda [2022-2023]

SKILLS

Technical Skills:

- Data Science & ML:** Supervised/Unsupervised Learning, Classification, Regression, EDA, Feature Engineering, Data Preprocessing, Data Cleaning, NumPy, Pandas, SciPy, Scikit-learn, XGBoost, CNN (ResNet), Generative AI
- Data Visualization :** Matplotlib, Seaborn, Plotly,Recharts, Power BI
- Databases & Data Management :** MySQL , Microsoft SQL Server, MongoDB(NoSQL) , PostgreSQL (Neon)
- Programming Languages & Web development :** Java , Python, R,C, JavaScript , HTML5 , CSS3
- Frameworks & Tech Stacks:** Java Spring Boot, MERN Stack -MongoDB, Express.js, React, Node.js.
Mobile Development - React Native
- Software Engineering Fundamentals :** Data Structures & Algorithms , OOP Concepts, Design Patterns
- UI/UX Design :** Figma
- Version Controlling :** Git/GitHub
- Interactive Notebooks :** Jupyter Notebook, Google Colab, Kaggle Notebook

Soft Skills:

- Leadership & Project Management
- Problem Solving & Discipline
- Communication & Collaboration

PROJECTS

APEXRATE: INTELLIGENT SRI LANKAN EXCHANGE RATE COMPARISON & FORECASTING PLATFORM - PERSONAL PROJECT

Tools & Technologies: React 18 (TypeScript), Tailwind CSS, Recharts, Spring Boot (Java), FastAPI, PostgreSQL (Neon), XGBoost, ExchangeRate-API

- Built full-stack exchange rate analytics platform aggregating rates from major Sri Lankan banks in real-time.
- Built interactive dashboards for currency conversion, historical trend analysis, and financial data visualization using React and Recharts.
- Engineered an XGBoost forecasting model achieving 44.6% MAE reduction over baseline, trained on 1,652+ historical USD/LKR records.
- Implemented automated rate comparison algorithm to surface best Buy/Sell USD rates, enabling data-driven financial decision-making.

GOVICONNECT: SMART AGRICULTURE PLATFORM & AI-BASED DISEASE DIAGNOSTIC SYSTEM [JAN 2026 – MAY 2026] GROUP PROJECT

Tools & Technologies : Java (Spring Boot), Python(FastAPI), RESTful APIs, CNN, MySQL , Gemini API ,

- Built a ResNet CNN classifier for paddy leaf disease detection across 4 classes, achieving ~92% training accuracy, ~90% validation accuracy, and avg. F1-score of 0.91 on a balanced dataset of 9,500+ images.
- Designed a Spring Boot + FastAPI microservices architecture with RESTful APIs and MySQL data pipelines for secure backend processing.
- Engineered "Govi Mart," a D2C e-commerce marketplace, alongside a smart advisory engine that delivers location-specific crop and fertilizer recommendations.
- Integrated Gemini API to automate forum support, providing context-aware crop advisory to farmers.
- Built admin dashboard with real-time news feeds, yield tracker, and system reporting tools.
- **MOBILE APP – Tools & Technologies : React Native, Node.js, Express.js, MongoDB, Cloudinary, JWT, Expo (EAS), Railway**
- Built and deployed a Node.js/Express.js REST API featuring JWT auth, 3-role RBAC middleware, Cloudinary-based media storage, and production Android pipelines via Railway and Expo EAS.

SMILECARE: WEB BASED DENTAL MANAGEMENT SYSTEM [JULY 2025 – DECEMBER 2025] –GROUP PROJECT

Tools & Technologies : Java (Spring Boot), RESTful APIs, Microsoft SQL server , HTML , CSS , JavaScript

- Developed a clinic management system to digitize manual paper-based workflows and enhance overall operational efficiency.
- Implemented RBAC authentication across 6 user roles (admin, staff, patient..) with bcrypt-hashed passwords.
- Features: Automated appointment scheduling , Patient profile management, Digital X-ray & diagnostics hub , Inventory & supplier tracking and Admin dashboard

AIML PROJECT: LOAN PREDICTION SYSTEM [JULY 2025 – DECEMBER 2026] – GROUP PROJECT

Tools & Technologies : Python , Pandas, Numpy, Scikit-learn , matplotlib, seaborn, Jupyter Notebook

- It predicts whether a loan will be approved or rejected based on applicant data using ML models.
- Built loan approval classifier using 6 ML algorithms; top model (Random Forest) achieved 91.05% accuracy with 5-fold CV.
- Performed EDA including correlation heatmaps, ROC curves, and distribution analysis to surface data imbalances and inform feature selection.
- Applied full preprocessing pipeline:missing value handling, encoding, normalization, and resampling to prepare clean, model-ready data.
- Achieved best performance with Random Forest (Accuracy: 91.05%, F1: 0.910), outperforming Logistic Regression, SVM, KNN, Decision Tree, and MLP.

SECOND-HAND CAR MARKETPLACE | JAVA SERVLET DEVELOPMENT [JAN 2025 – JULY 2025] – GROUP PROJECT

Tools & Technologies : Java Servlet , GlassFish server, File based data management, OOP concepts, HTML,CSS

- Built OOP vehicle marketplace with secure auth, dynamic listings, and transaction management.
- Optimized data processing by implementing a custom Merge Sort algorithm on linked structures, ensuring highly efficient and verified sorting under varying loads.
